Instruction of Quick Operation of UCANDAS V1.0

1. Software Installation

This software does not need any installation procedure, and just copy the files in the CD to the computer. The CD is not with direct running function, but to save its original software version. The software works on WINDOWS XP SP3, WIN7, WIN8.

For easier operation, we can create a shortcut of UCANDAS.EXE in desktop. When running it, double click it. The way to create the shortcut is to right click the UCANDAS.EXE. Please follow the figure 1:

2. VDM Driver Installation

1.1 Find the [VDM DRIVER for Windows] file in the CD, and choose a installing file that matched with your operating system. Please refer to figure 2:

x64 x86 CP210xVCPInstaller_x64.exe P210xVCPInstaller_x86.exe dpinst.xml ReleaseNotes.txt SLAB_License_Agreement_VCP_Windows.txt slabvcp.cat slabvcp.inf
FIG 2

2.2 Running the setup, and finish the USB driver installation according to installation tips. Please check figure3,4:

FIG 6

Explanation:

Setup mode: Diagnosing mode is an actual test mode, while demo mode is with software demo function, not actual testing cars. Setting units: You can choose inch or metric units as you need

Connecting way: Choose USB when connecting with cable, and under demo mode. Choose WIFI when testing wirelessly.

3.2 Car Diagnosis

Please connect VDM to the OBD diagnostic block of the car. Then the power indicator will light. Start UCANDAS software. Connect the USB to your laptop or wait for the WIFI connection after choosing USB or WIFI connection. The first time you use WIFI, it may takes some time. The fixed SSID of VDM is UCANDAS. If the WIFI failed, please set it manually. When WIFI is connected successfully, the VDM wireless icon will

.agnose" i light. After connecting, click" car diagnose" icon . Refer to figure 7:
