

## VCM equipment installation tips and first time user guide

2011-8-16

### Installation Tips:

#### 1.1 Please install IDS and JLR to Local Disk C

IDS software is for Ford and Mazda, and it must be installed to **Local Driver C**; JLR software is for Jaguar and Land Rover, and **Local Driver C is also required.**

Moreover, **at least 15G available space** is required on your Local Driver C when installing the software

#### 1.2 Requirements on computer configuration

Computer memory: **at least 1GB**

CPU: at least **1GHz**

**Netbooks (ULPC:Ultra low-cost PC) not allowed**

#### 1.3 Requirements on computer USB interface

Every laptop has more than one USB ports, one of them is the **MAIN PORT**, and others are **AUXILIARY PORT**, please make sure the USB port works and use **MAIN PORT**

#### 1.4 Requirements on computer operating system

For computer operation system, please use **Windows XP(sp2 or sp3)**

**professional Edition 32-Bit.**

**Home Edition and other systems are not allowed**

## 1.5. Requirements on computer Antivirus software

Please **uninstall all of the Antivirus software** in your computer, in some case the Antivirus software may delete the testing software as Virus.

Do as followings:

- 1 Temporarily disable your PC's firewall software
- 2 Temporarily disable any internet popup blockers
- 3 Temporarily disable any anti-spyware programs
- 4 Temporarily disable any anti-virus programs
