

## How to Update X100 Pro Key Programmer

1. You need to register with Serial Number and Password in advance
2. Click module below to download Update Tool via <http://www.xtooltech.com/>

Run downloaded software to upgrade

Kindly attention, please:

- 1). Do not format the TF card before / after update;
- 2). Do not use old serial number and password on X100 + website for registration.

3. Power up X100 + device;

Select “Self Test” >> “Keyboard Test” ;

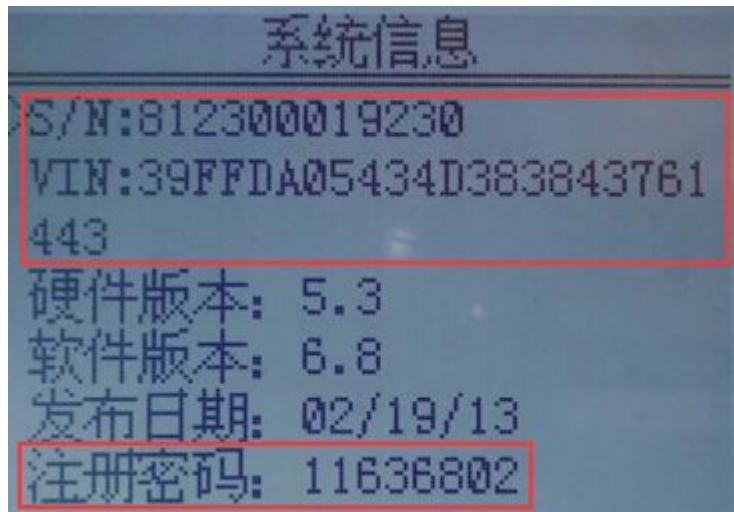

Press device buttons according to this order: F1-F2-UP button-DOWN button-ENTER-ESC

4. Exit the main menu;

Select "System information" ;

Write down and provide the X100 + device SN, VIN and register password to Xtool customer service to run an update.
